

FIRE BAN CURRENTLY IN PLACE - Effective May 5, 2023

Effective immediately, a Fire Ban is now in place which affects the entire county due to the current and forecasted conditions. The Fire Ban is in effect until further notice. This requires that ALL outdoor fires presently burning, be extinguished and the lighting of ANY outdoor fires is banned. The only exceptions currently are internal household fireplaces; barbeques; and AER flaring. All current fire permits and fireworks permits are hereby cancelled, and no new fire or fireworks permits will be issued until the Fire Ban has been lifted.

A common question we receive is with regard to propane appliances, and whether they form part of the fire ban. Please note that propane appliances are deemed as acceptable for use, with a caveat to always use extreme caution for any type of ignition source during a fire ban.
